

Skin Needling

Skin Needling is a non-ablative Skin rejuvenation technique that offers a more physiologically compatible way of triggering collagen synthesis.

The Medik8 Titanium Microneedle Roller/Stamp creates a multitude of tiny pin prick wounds to the skin which:

- Induce the release of growth factors that stimulate the production and formation of new collagen and elastin
- Enhance the penetration of topical formulations:
 - Increasing bioavailability of active ingredients
 - Increasing/enabling the absorption of large molecules >500Da

Recommended number of sessions per treatment: 3

Indications

Ageing Skin, Scars, Pigmentation, Stretch Marks, Cellulite

Benefits of Skin Needling

- Visible and long lasting results usually after 6 weeks
- Natural collagen production for a year (on average)
- Minimally invasive
- No skin damage (no removal of the epidermis)
- Virtually painless (topical anaesthetics can be used)
- Minimal or no side effects
- Minimal discomfort post-treatment
- Can be performed in conjunction with other treatments
- Short healing time (48 hours)
- Suitable for all skin types
- Suitable for all body parts including skin

Price

3 Skin needling sessions	€330
Or	
1 Skin needling session	€180 + €100 per consecutive session
